

Lech Pre-filtration Series

Lech Series Pre-filtration

◆ Upgraded dual mesh filter significantly improves filtration precision

40µm filter mesh + 90µm large-aperture backwash filter
Effectively blocks sand, rust, algae, suspended particles, etc

◆ Upgraded dual-sided scraping, 3D scraping clean

High-speed siphon flushing, no need for frequent disassembly and cleaning. Dual-sided scraping (filter mesh and filter bottle scraping) with 360° rotation

◆ 4T/h large water flow meets whole-house water needs

Filtration flow rate reaches 4T/h, abundant water supply

◆ Wash time recording and real-time pressure display
