

Alpsee RO Series

Alpsee Series RO Water Purifier

WR400.C/WR600.C

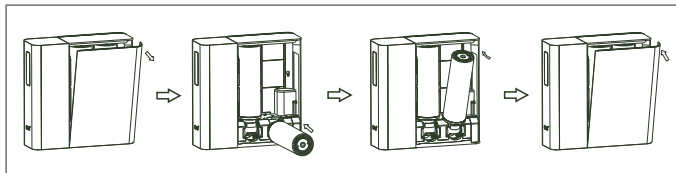

- Dual-core high-precision multi-purification system, 3-in-1 post-carbon filter design
- Four-stage filtration to 0.0001 μ m level
- Intelligent automatic flushing technology, 3-year long-lasting RO membrane
- Grade 1 water efficiency, 65% water production rate
- Tankless and high-flow design, every drop of fresh
- EZ-LevelTM patented filter, dual-lock water system design
- Real-time monitoring of water quality and filter status via smartphone app

◆ Wi-Fi Real-time monitoring of water purification status

Via the smartphone app, monitor water quality, track filter lifespan, remotely control the unit, including flushing and status updates. Easy and clear control from your smartphone.

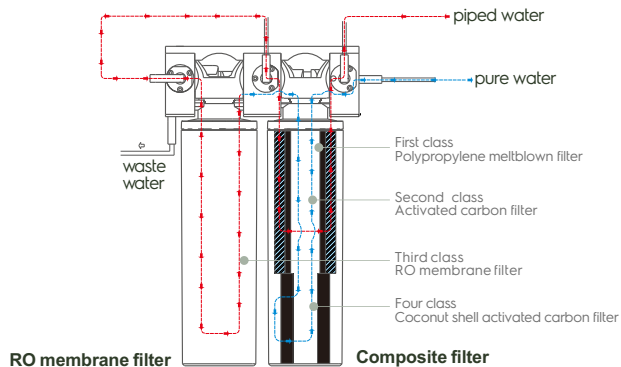

◆ Dual-lock water system, replacement in 3 seconds

Both filter and bottom shaft with water stop, double leak-proof EZ-LevelTM filter replacement system, Easy DIY

◆ Dual-core purification, Four layers of filtration

The unique three-in-one composite scale inhibitor core and imported RO membrane effectively filter residual bacteria, heavy metals, pesticides and other harmful impurities in the water.

A close-up photograph of a young boy with dark hair and a pink shirt drinking from a chrome water fountain. Water is flowing from the spout into his mouth, and some water is dripping from his chin. The background is a soft, out-of-focus yellow. A dark green rectangular box is overlaid on the bottom left of the image, containing the text 'Rhine RO Series' in white.

Rhine RO Series

Rhine Series Dual-Outlet Water Purifier

WR400.D-A/WR600.D-A

- Dual-outlet design, pure and purified water, energy-efficient
- Four-stage filtration to 0.0001 μ m level, 3-year long-lasting RO membrane
- Grade 1 water efficiency, 65% water production rate
- High capacity: 400G/5000L and 600G/6000L, with >90% initial desalination rate
- WiFi/Bluetooth smart modules, with dual platinum probes for raw and pure water, real-time water quality monitoring
- Smartphone App alerts for leaks, low water, with local and remote double alert and double control
- Multiple automatic flushing for health and extended filter lifespan
- EZ-Level™ patented filter design, filter replacement in 3 seconds

◆ Pure and purified dual-water kitchen companion

- Four-filter design with post-carbon filtration, better-tasting pure water
- Water filtered by filters 1 and 2 is highly clean, large flow rate, ideal for kitchen cleaning needs.

◆ Wi-Fi Real-time monitoring of water purification status

Via the smartphone app, monitor water quality, track filter lifespan, remotely control the unit, including flushing and status updates. Easy and clear control from your smartphone.

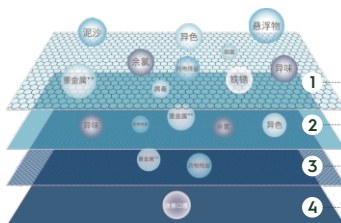

◆ 3 quick & easy steps to change the filter—saving time and effort

Magnetic housing, tool-free quick opening, EZ-Level™ patented filter design, filter replacement in 3 seconds.

◆ Four-stage high efficiency filtration

Protecting your family's drinking water health, Effective filtering of heavy metals, limescale, residual chlorine and other harmful substances.

- 1 PP cotton filter** | Polypropylene meltblown filter (removes large particles)
Replace every: 3-6 months (based on water quality and usage)
- 2 Activated carbon filter** (adsorbs chlorine, color, odor)
Replace every: 6-12 months (based on water quality and usage)
- 3 RO membrane** | RO membrane filter (0.0001 μ m level precision)
Replace every: 24-36 months (based on water quality and usage)
- 4 CTO filter** | Post-activated carbon filter (improves taste)
Replace every: 6-12 months (based on water quality and usage)
