Maintenance Instructions

Filter housing must be grounded

When using electric plugging, please replace the filter element.

The system must be turned off before removing the clogging indicator light and power connector.

Δp -Q ISO 3968

The housing curves apply to mineral oil with a density of 0.86 kg/dm^3 and a kinematic viscosity of $30 \text{ mm}^2/\text{s}$. In this case, the differential pressure changes proportionally to the density.

GRADIENT COEFFICIENTS (SK) FOR FILTER ELEMENTS

The gradient coefficients in $\text{mbar}/(\text{l}/\text{min})$ apply to mineral oils with a kinematic viscosity of $30 \text{ mm}^2/\text{s}$. The pressure drop changes proportionally to the change in viscosity.
